CULLIBILITY.

The wild phantoms and shrieking cries of a worthless humbug can make money by imposing upon the credulity and ignorance of an honest public, and the supply of this species of work seems more than an adequate demand. The enunciation of facts—facts that have stood crucial tests—facts proven by brain force and tangible evidence, should satisfy all laudable enterprises; but the execrable practice of teaching false ideas and doctrines for self aggrandizement is truly reprehensible and should be scorned by all classes.
